## RESEARCH INTERESTS

**Computational Photography, Computer Vision, Machine/Deep Learning**

## EDUCATION

**Northwestern University**, EVANSTON, IL, USA 06/2015 - PRESENT  
• *Ph.D. candidate*, Computer Science

**Lehigh University**, BETHLEHEM, PA, USA 09/2011 - 12/2014  
• *Master of Science*, Electrical Engineering

**Huazhong University of Science and Technology**, WUHAN, CN 09/2007 - 06/2011  
• *Bachelor of Science*, Optics

## RELATED GRADUATE COURSEWORK

Machine Learning, CUDA, Graduate Algorithm, Deep Learning from Scratch, Introduction to Optimization, Introduction to Computational Photographic, Introduction to Computer Vision, Photonic Information Processing.

## PROFESSIONAL EXPERIENCE

**Northwestern University** EVANSTON, IL, USA  
RESEARCH ASSISTANT WITH DR. OLIVER COSSAIRT 06/2015 - PRESENT

**Research** on computational algorithms to improve the quality of 3D imaging and inverse problem reconstruction using optimization and machine/deep learning. **Interest** in 3D imaging from micro-scale OCT to marco scale time-of-flight imaging, Photo Stereo 3D imaging, and photometric stereo, and 3D applications in high level computer vision problems such as face recognition and SLAM, and machine perceptions in robots and VR/AR systems.

- Work on multi-frame superresolution for depth imaging [11] and use deep learning for high resolution depth images with multi frames [Ongoing].
- Sensor fusion of a novel depth camera with low lateral resolution and a high lateral resolution RGB camera using rule based and deep learning methods [Ongoing].
- Work on inverse problem reconstructions in scattering media by leveraging compressive sensing and deep learning (ResNet-18) [14,13].
- Working on hands recognition with single-pixel cameras and deep learning [Ongoing].
- Develop a novel 3D imaging system with sub millimeter depth resolution including the instrumentation and image processing [16, 10, 8].
- Utilize compressive sensing to improve the lateral resolution of the off-the-shelf ToF camera by 3 ×, and built a linear model for CS reconstruction for complex-value data [9].
- Photogrammetry and photo-metric stereo and their applications in culture heritage [6,5].
- Working on Non-line-of-sight (NLOS) imaging with superheterodyne holography [12, 15]

- Working on single frame time-of-flight depth imaging with deep learning [Ongoing].

**Facebook Inc.**

REDMOND, WA, USA

RESEARCH INTERN WITH DR. MICHAEL HALL AND DR. SHUOCHEN SU

05/2019 - 09/2019

**Work** on machine vision with IR assisted stereo for VR/AR applications.

- Develop a deep learning (Unet) based fusion of mono and IR images for IR assisted stereo, which is more robust to the rule based methods.
- Build a simulation pipeline with the internal tools to evaluate the dynamic control of the projector for IR assisted stereo, which demonstrates a reduction of the IR illumination power by more than 10×.
- Several patents are drafted.

**Oculus VR / Facebook Reality Labs**

REDMOND, WA, USA

RESEARCH INTERN WITH DR. MICHAEL HALL

05/2018 - 09/2018

**Model** and evaluate a novel depth camera for AR system and RGB-IR crosstalk correction for novel cameras in VR/AR systems.

- Solve the RGB-IR crosstalk correction with optimization and filtering for the novel CMOS camera in AR system.
- Build the radiometry model for a novel active depth camera.
- Model and evaluate of the novel depth camera with simulations and experiments.
- Five patents filed after the internship.

**Google [X]**

MOUNTAIN VIEW, CA, USA

HARDWARE ENGINEER INTERN WITH DR. EMILY COOPER

06/2016 - 09/2016

**Work** on machine perception in Robotics team

- Optical design for the diffractive optical elements (DOE) with phase retrieval algorithms for IR assisted stereo.
- Evaluate the first batch of DOE and verify the design successfully.
- Work with cross-functional teams at Google.
- One patent granted for high dynamic depth ranging for robotic applications (US10277842B1) [P1].

**NSF Innovation Corps program (I-Corps).**

NEW YORK CITY, NY, USA

ENTREPRENEUR LEAD

02/2014 - 04/2014

- Supported by National Science Foundation (NSF).
- Arranged 68 face-to-face or phone interviews with eye doctors, sales, technician, and university researchers in 6 weeks and updated with a weekly presentation.
- Trained to better communicate with customers and team members.

**Lehigh University**

BETHLEHEM, PA, USA

RESEARCH ASSOCIATE WITH DR. CHAO ZHOU

06/2012 - 08/2014

**Research** on Biomedical image processing, Optical coherence tomography (OCT) and its biomedical imaging applications [1, 3, 4].

- Hands-on experience to set up a new lab from zero in half a year.
- Designed and set up an ultrahigh-resolution OCM system (include supercontinuum laser,

fiber coupler, polarizer, collimator, telescope system, axicon lens, galvo scanner, grating, line-scan camera) with an extended depth of focus of 200, 1.5-axial resolution, and 2.3-transverse resolution.

- Set up three different spectral domain OCM systems with center wavelength of 800 nm and 1300 nm.
- Wrote a neuron counting algorithm for neuron analysis in 3D brain slice sample [3].

## SKILLS

Python, MATLAB, PyTorch, C++

#### PATENTS

- [P1]. E. Cooper, F. Li, “**Dynamic range for depth sensing**”, US10277842B1, **Granted**, 2019.
- [P2]. O. Cossairt, F. Li, F. Willomitzer, P. Rangarajan, “**Micro resolution imaging range sensor system**”, US20190301857A1, 2019.

#### HONORS AND AWARDS

**Travel grants** from Northwestern University, 2018, 2019.

**Dean’s Fellowship** from Lehigh University, 2011.

**National Scholarship for Encouragement** from Ministry of Education of China, 2010.

**National Scholarship** from Ministry of Education of China, 2009.

#### TEACHING EXPERIENCE

Teaching Assistant, Introduction to Computational Photography, EECS, 2018 Fall

#### PAPER REVIEW

CVPR 2015, ICCV 2019, ICCP 2019, Optics Express, Journal of the Society for Information Display, Remote Sensing, Sensors, Applied Sciences, Chinese Optics Letter
